Cleaning Method :

First Time Use: When the portable alkalizer is new, be sure to give it a good rinse before use. Follow the steps below:

- Fill ¾ of portable with water and empty the sachet of cleaning agent provided in the package.
- Shake gently to dissolve the cleaning agent in the water. Let it sit for 10 minutes.
- Pour away the water after 10 minutes and then rinse it under running water for 2 to 3 times.

Direction For Use :

The portable alkalizer is now ready for regular use. Fill the portable alkalizer with drinking water and in 10 minutes, you can enjoy and experience the goodness of ionized alkaline water with rich antioxidants! Please empty the alkalized water from your portable into your regular drinking water container.

Maintenance :

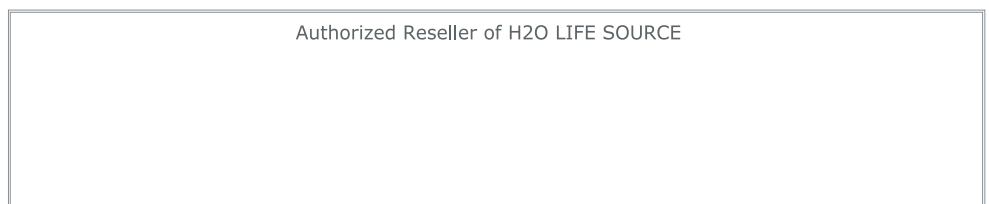

It is recommended that you wash the portable alkalizer once or twice a month. Pour one glass of edible vinegar and top up the portable alkalizer with regular clean water. Shake the portable alkalizer gently for about 10 times. Pour away the water and then rinse it under running water for up to 2 to 3 times to rinse off remaining vinegar. Proper cleaning ensures performance of the Ion Stick & Catalyst Ball for 9 to 12 months.

Precautions :

- Do not leave the portable alkalizer under direct sunlight, store at room temperature.
- Do not disassemble the Ion Stick and Catalyst Ball.
- Do not use water with temperature over 65 degree Celsius.
- Do not use alkaline water for oral medication. A neutral pH is always recommended when taking medication.

Name of Model:	KYK Portable Alkalizer
Manufacturer Approval Code:	2213
Warranty:	30 Days
pH Range:	>7.0 to 10
ORP Range:	Up to - 400mV
Temperature:	5°C ~ 40°C
